New York, NY 10022

Dear Sirs:

I am writing to inquire about your program to provide grant support to biomedical research programs designed to explore the basis of carcinogenesis. We have recently made some fundamental observations about a family of transmembrane receptors that hold promise as anti-tumor agents, and would like to inquire about the possibility of appplying for support for a continuation of this work from your organization.

Please send me information about applications for support and relevant deadlines. If it would be useful, I would be pleased to discuss the nature of our proposal prior to formal submission. I can be reached by phone at 206-543-1768 or by FAX at 206-685-1792.

Sincerely yours,

Kenneth A. Walsh
Acting Chair & Prof. of Biochemistry
